

When You Want to Alkalize Stomach Fast

Try This Amazing Fast Way—The "Phillips" Way Millions Are Adopting

On every side today people are being urged to alkalize their stomach. And thus ease symptoms of "acid indigestion," nausea and stomach upset. To gain quick alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating. OR—take two Phillips' Milk of Magnesia Tablets. Relief comes almost at once—usually in a few minutes. Nausea, gas, "fullness" after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. Get either the liquid "Phillips" or the remarkable new Phillips' Milk of Magnesia Tablets. Each one equals a teaspoon of the liquid. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM: Each tablet is the equivalent of a teaspoon of liquid "Phillips" Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

WORLD HAPPENINGS BRIEFLY TOLD

Rev. A. W. F. Blunt, Bishop of Bradford, has suggested that the Church of England and the free churches unite in coronation services in parish churches.

An epidemic of broken bones struck Lindsay, Ont. Fourteen leg-fractures cases were treated in hospital, while many broken arms were set and patients sent home.

Foreign Secretary Anthony Eden indirectly invited Germany to participate in League of Nations disarmament committee sessions in Geneva May 6.

Sir Philip Sassoon, air under-secretary, told the House of Commons nine aircraft factories are being built or will soon be constructed in line with Britain's rearmament program.

Dr. H. H. Kung, Chinese minister of finance, announced he had called \$800,000 to Admiral Cury T. Grayson, head of the American Red Cross, to aid victims of the United States flood.

Twenty-three Alpine soldiers were killed, government officials disclosed, when they were buried under an avalanche of snow while on patrol in the Italian Alps. Bodies of six had been recovered.

According to a written judgment filed in court at Toronto by county court Judge F. M. Field, a parking lot proprietor is responsible for damage occurring to a customer's automobile while in the proprietor's custody.

The Scottish Aircraft and Engineering Company announced in London construction had started on a monoplane of the Clyde Clipper type which will participate in the New York-Paris air race next August.

An Odd Friendship.

Resident of Victoria Has Fed Sea Gull For Eight Years

After being fed from the hands of W. B. Ryan of Victoria, B.C., for eight winters this sea gull should know his benefactor—and does.

Mr. Ryan, a fisherman, has fed the animal things his odd feathered friend has done.

Once the big bird flew to the hood of his automobile while he was a block away and awaited Ryan's arrival. Several times it has appeared at his club and clamored for a meal.

A member of the firm employing Ryan was embarrassed by the gull fluttering down the street after Ryan.

The gull shows up every year in October and leaves in April. Shortly before he leaves on his annual flight he brings along his new mate for Ryan's approval.

Legal Adviser Knighted

Conferred On Walter Monckton By King George VI.

King George VI. ceremoniously conferred one of the first knight-hoods of his reign upon Walter Monckton, legal adviser to former King Edward VIII. The ceremony of touching the new knight's shoulder with a sword took place in the drawing room of 145 Piccadilly, still the home of the king and queen, instead of amid the customary surroundings of Buckingham Palace.

Upward of 800 roses are recorded for the various parts of the palmyra palm, which is considered the most useful plant in the world.

Modern birds chew their food with their stomachs, or gizzards.

British Crown Lands

Exchanged By National Treasury For King's Yearly Grant

As is customary in Britain, the new King, George the Sixth, will turn the crown lands over to the nation during his reign in exchange for a definite yearly grant from the national treasury. The custom dates back to George the Third, but that monarch did not transfer all of the crown lands, but only enough to gain the sum of money he desired. William the Fourth was more impetuous and he was the first sovereign to give up all of the crown lands.

The amount of money that King George the Sixth and his Queen will receive from the nation probably has not been determined. The King will send a message to the Commons requesting that they give consideration to the matter and parliament will appoint a committee. The committee will consider not only the needs of the royal family but the possibility of effecting economies. When King Edward the Seventh came to the throne the provision for the Royal Household was eliminated. Oddly enough, King George the Sixth, who at that time was a champion of Queen Alexandra and wished to have \$50,000 voted to her as a separate grant. It was explained, then, with the king's permission, that \$33,000 of the \$110,000 being recommended by the committee for the joint Privy Purse would be allocated to the queen.

George the Fifth accepted a joint Privy Purse of \$97,800. In recent years he requested that this be reduced to \$60,000. King George and Queen Mary were not ostentatious. Whatever the amount for the new King may be it is understood that the nation will fund financially by the arrangement.—Toronto Star Weekly.

New Service For Public

Modern Information Bureau Installed By C.P.B. in Montreal

The first information bureau of its kind in Canada was opened in Montreal, when the Canadian Pacific Railway put into operation its new telephone bureau, comprising the latest equipment of the Bell Telephone Company, and combining several of the railway's former services. After more than a year's research work on the part of the two companies, the new apparatus has been installed. A specially trained staff of 24-hour service, with five girls handling ten trunk lines, giving information on train times, routes, and passage, parlor and sleeping car fares. By means of a novel switching arrangement, immediate connection is made with the sleeping car agent's office if desired. One telephone call will produce the same information under the new system, as two or three under the old.

Comma Makes A Difference

Omission Might Have Made Trouble For Ship's Operator

"The Authority for crew effects to be taken out of dock premises is usually signed by the Chief Officer of the ship. In the ordered disorder of ship charges it is easy to imagine that this officer finds little time to cross the 'A's' and dot the 'I's' but the omission of a comma on a certain pass might have had embarrassing consequences for the bearer. The gatekeeper is easy to let the bearer, wireless operator of the steamer, pass out of the docks with two cases containing his personal things and his wife."

It is not recorded if the Port Authority's police constable at the dock gate exercised his right to search outgoing packages in the hope (or fear) of discovering another trunk murder.—P. L. A. Monthly.

Making Air Travel Cheap

New Plane In England Designed For Fast Transport

Efforts are being made in Britain to popularize the airplane as a means of family transport. There is now being offered to the general public in that country, and demonstrated over a 5,000-mile circuit, an airplane for which some remarkable claims are being made. It can, it is said, be bought on time, flown, insured and housed all for about \$10 a week. It can land or take off in a small field, has a top speed of 80 miles, a cruising speed of 70, and cost less than five cents an hour to fly. Its 10-horsepower engine is said to be easily kept in good order as that of the average small car.—Edmonton Journal.

One Still Wonders

I understand that radio stations are equipped with mechanical hand-clappers, but I am wondering how they produce the laughs. After each wacker and mirthless joke the laughter sounds so natural and spontaneous one is almost made to believe it is human. Yet surely people can't really be laughing at such things. Maybe they have attendants going about ticking the guests in the ribs. Or is it done with phonograph records?—Edna in Chicago Tribune.

The expression, "a coon's age," means a very long time, but the coon actually has a life span shorter than that of many other animals of its size.

"She has a head like a doorknob." "How come?" "Any man can turn it."—2189

VERY YOUNG "MISSIES" ADORE RUFFLES ON THEIR Dainty DRESS-UP FROCKS

By Anne Adams

Here's joy to please the feminine heart of a very young fashion-pla—

—a dainty Anne Adams frock that's a fully illustrated step-by-step sewing instructions included.

Send twenty cents (20¢) in coin or check for a copy of this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number. Send order to The Anne Adams Pattern Dept., Winnipeg, Newspaper Unit, 175 McDermott Ave. E., Winnipeg.

Gave Up Career As Minister Because He Stammered

A hundred and five years ago, Charles Lutwidge Dodgson was born at Daresbury, Cheshire.

The man who wrote the immortal "Alice in Wonderland," which he published in 1865 under the pen-name of "Lewis Carroll."

This delightful fantasy, which has recently been attacked by someone in this country, whose name has already been forgotten, as demoralizing, was based on stories which the author had made up for the entertainment of the children of Dean Liddell, among whom Alice came to have been his favorite.

Although he wrote other stories and some verse—among which "The Hunting of the Snark" was well received—"Carroll's" claim to literary immortality rests upon the book which gave to literature and speech such familiar figures as "the Mad Hatter," "the March Hare," "the White Rabbit," "the Red Queen" and "the White Queen."

While "Carroll" was writing stories Dodgson went on writing mathematical works, and he was accustomed to say when charged with the authorship of "Alice," that "Mr. Dodgson" neither claimed nor acknowledged any connection with the books not published under his name.

At last, yet, it had not been for those books, who to-day would know anything about the man who turned to mathematics because he had stammered himself out of a career in the pulp?

Lord Hugh Cecil, senior member of Parliament for Oxford University, and provost of Eton College, has applied for "The Children's Hundreds," terminating his long and distinguished career in the House of Commons.

There will be some unusual coincidences which the motor car registers can hardly hope to avoid. For instance, they played a rather mean trick on one of Canada's great bankers.

We saw this bank president get out of his car the other day. The license number was "1-X-2."

Surely a man who deals in millions is entitled to a more difficult mathematical problem to put on his car than "one times two"—Financial Post.

Ontario's License Plates

Number Received By Banker Under New System Hardly Suitable

In Ontario this year they have a new system for numbering automobile license plates. The letter of the alphabet comes in between the digits so that the numbers read "14-C-881" or "9-A-39," etc.

There will be some unusual coincidences which the motor car registers can hardly hope to avoid. For instance, they played a rather mean trick on one of Canada's great bankers.

We saw this bank president get out of his car the other day. The license number was "1-X-2."

Assured Of No Change

People Of Holland Need Not Fear A Dictatorship

The Dutch populace has received assurance that the marriage of their crown-princess to a German prince will not lead to a dictatorship in Holland.

Crown Princess Juliana, the world's only heiress to a real gift throne, clings to the homespun democracy of her mother, Queen Wilhelmina.

When it first became known that Juliana was going to marry a prince from Nazi Germany, thousands of sturdy Dutchmen asked themselves if this union might not produce the world's first dictatorship. But their fears soon were allayed by royal hints well placed that the prince did not hold views commonly ascribed to Nazis.

Prince Bernhard himself hastened to show by act and word that whatever influence he might have over Juliana would not be exercised to bring swinging her from the fundamentally-conservative ways of her mother.

Lecturers Absent
Due to Blocked Roads

Owing to blocked roads, due to the heavy wind Wednesday evening, the lecturers responsible for the program of the Massey-Harris tractor school, sponsored by Brown & Todd, local agents, failed to arrive. Stepping into the breach, G. E. DeLong, assistant superintendent of Cereal Crops, Lacombe Experimental Station, gave an informative talk on the value of the one-way disk in soil cultivation and weed control. For this district he advocated shallow cultivation in the fall to allow weed seeds to germinate. Low winter temperatures and spring cultivation should kill the weeds which have germinated.

Machinery On Display

On display were a one-way disk and a tractor equipped with huge rubber tires, and Mr. DeLong also quoted figures which showed the reduction in the amount of gas required to run heavy machinery equipped with rubber tires. Brown & Todd are arranging to feature the tractor school and program of talking pictures at the Central Alberta Pavilion on Saturday, Feb. 27th, when it is hoped that the weather conditions will not interrupt the free attendance of farmers and others interested.

Sport-Scope

By JACK MCCAUGHERTY

The Buzzards took a commanding lead in the first round of the I.S.H.L. play-offs on Tuesday, scoring the first shutout in the league this year, a 3-0 victory over the Black Hawks. It was the first of the two-game series (total goals to count), the next of which will be played on Thursday. The winner of this series will then tackle the top-sit Hornets on Saturday in the first round of two out of three games for the league honors.

Meanwhile, the local intermediates advance into their fourth round of play for the Black Cup. Their next opponents lie south—Red Deer. This team has had a jinx on the locals so far this season but our boys feel confident—why, look what Vegreville did!

The Allan Cup hockey final will be staged in Calgary starting April 6th, it was announced last Friday by the Canadian Amateur Hockey Association. This is great news for fans in Calgary and district because it will mark the first time that this final has been staged in this part of the West. The Western champions will also be crowned in the Southern city. This games to be played March 28th, 29th and 29th. Calgary's arena is making good.

DID YOU KNOW THAT?

Bob Kennedy, Calgary Bronks, won the scoring title in the Alberta Senior Six with 42 points. . . The fight scheduled for June 22nd between Braddock and Louis will give Champion James J. 47½ per cent of the receipts. . . Syl Apps of the Toronto Leafs will probably be chosen as the best rookie in the N.H.L. this year. . . One win and five seconds is Alberta's record in nine trips East in the MacDonald Brier.

A visitor to the country was very surprised on paying a visit to the local churchyard to see the wall in such a dilapidated condition, and he called the sexton's attention to the same. This worthy's explanation was as follows:

"It be like this 'ere, sir. Them as is inside can't get out, and them as is outside don't want to get in, so we never trouble about 'em wall."

Bentley

BENTLEY—Miss Alma Simon of Orest District, who has been in Camrose for some time, returned home last week. She is recuperating from an appendicitis operation. Percy Thorp was down from Edmonton the first of the week. He has recently been appointed assistant manager of the Gale & Lidgate Motors Ltd., Edmonton.

Miss Evelyn Coultis spent part of last week at her home in Ekville. Nurse Dwan was a Calgary visitor over the week-end.

Skating Carnival Held

A skating carnival was held at the Bentley skating rink on Saturday evening, under the auspices of the public and high schools. A good crowd was on hand.

Those receiving prizes were: Comic Costumes—J. Don Garries (Jester); 2. Herby Johnston (Pop Eye); 3. Donald Dickson (Robot). The Winner of the Costume Contest was 1. Darrel Palmer (Babe Ruth); 2. Clifford Hergott (Bell Boy); 3. Doris Holmes (Scottish Lassie).

Bribs at the hospital recently were: To Mr. and Mrs. Edna Miller of Gull Lake District on Feb. 20th a son. To Mr. and Mrs. R. Parker, Sunset District, on Feb. 21st, a daughter. To Mr. and Mrs. O. A. Baker of Ponoka on Feb. 21st, a son. Mrs. J. G. Evernden spent some days last week here with Mr. Evernden. She returned home to Calgary on Friday.

"Everybody's Old Man" At Avalon Theatre This Week

"Everybody's Old Man" heads a fine double feature program at the Avalon Theatre this Thursday, Friday and Saturday. Irvin S. Cobb, portrayed as the owner of a canned goods factory, leaves for a trip to Europe, and the business is left to the care of his nephew, Norman Foster.

Through humorous incidents on his trip, Cobb comes about to buy rival business and almost puts his nephew, Foster, and his own factory out of business. The disentanglement of this plot is interesting and humorous as it moves to a thrilling climax.

The other half of the bill, "Gentle Julia," features that new young star, Jane Withers. The plot is a real Turgenev comedy-romance and is sure to please and "tickle" every member of the family.

Social Credit W.A. Formed in Lacombe

Members of the Women's Social Credit Group which had disbanded at the end of last year, in order to merge with S.C. Group No. 1, have now formed a Women's Auxiliary, with Mrs. W. J. Trot as president; Mrs. W. Granna, vice-president, and Mrs. E. Street, secretary.

Their first meeting was held at the home of Mrs. J. Lamont on Thursday, Feb. 18th, when plans were made for carrying on relief work where needed. A quilt is to be started at the next meeting. A resolution passed that the auxiliary would donate \$100 per month to the support of Prestige Alberth's broadcasts, the donation to alternate each month between Calgary and Edmonton. Mrs. T. Barker and Mrs. V. Granna were appointed a sick committee. It was decided to hold regular meeting on the first Monday of each month, the March meeting to be held at the home of Mrs. W. J. Trot.

The Churches

Thursday—Service at 7:30 p.m.
Tuesday evening—Scouts will meet at 7:30 p.m. in St. Cyprian's Hall.
Wednesday evening—A.Y.P.A. members will meet in the Hall at 8 p.m.

ST. ANDREW'S UNITED CHURCH
Rev. R. E. Layton, R.D., Minister
Services at 11:00 a.m. and 7:30 p.m.
Sunday School at 11:00 a.m.
February 28th is "Youth Sunday." There will be a special service on Sunday evening. The theme will be "The Widow's Son," a study of the life of D. L. Moody, who was born 100 years ago, and who did so much for the father of America.

A Father and Son Banquet will be held in the Church Hall on Friday evening.
The Ladies' Guild meets on Wednesday at 3:30 p.m. at the home of Mrs. Misenor.

Coming Events—The Eastern Canada on March 28th. A lecture by Rabbi J. J. Eisen of Edmonton, "Bumala in Scandinavia," dealing with the co-operative movement in Denmark and Sweden.

CHRISTIAN SCIENCE

At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be "Christ Jesus." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "And when Jesus was come into Peter's house, he saw his wife's mother laid, and sick of a fever. And he touched her hand, and the fever left her; and she arose, and ministered unto them" (Matthew 8:14, 15). One of the correlative passages from "Science and Health" under Key to the Scriptures, by Mary Baker Eddy, is as follows (page 51): "His purpose in healing was not alone to restore health, but to demonstrate his divine Principle. He was inspired by God, by Truth and Love, in all that he said and did."

Horse Is Gaining; No, He's Losing

WASHINGTON.—The horse is either gaining or losing popularity—you can take your choice. The census report reported today a pronounced increase, on the one hand, in the production of horse-drawn vehicles for 1935, the latest census on the industry. The business had advanced \$2,000,000 from 1933 to 1935, it said.

Equestrians scarcely had galloped through the capital with the glad tidings when the bureau trotted out another bulletin. It showed a pronounced decrease in production of horseshoes for 1935.

"The production of horseshoes in the United States in 1935," the bureau said, "amounted to 246,635 pairs, a decrease of nearly 21 per cent, as compared with 1933, and of nearly 70 per cent as compared with 1925."

THE BUDGET
He: "Is your budget coming along all right?"
She: "Oh, it will balance if we do without something we need, so that we can buy something I want."

Hart, Calgary, Edmonton, Vancouver
and Victoria

"Royal Household"

Wins Every Time

The superior breed, cakes and pies you can make from this flour will be a real treat to the family.

"Royal Household" is triple-tested for wheat quality before milling, for flour quality during milling and for baking quality after milling. It just has to live itself results.

Follow these simple rules:

- 1 Write your note on the coupon (or on separate paper) and sign your name and address at end of your dealer.
- 2 "Royal Household" cut from the coupon and send it to your dealer.
- 3 You may send as many different suggestions as you wish, each accompanied by a section of the least size of the "Risk 1."
- 4 This contest will close March 6, 1937. All entries must be post-marked not later than this date.

Send your suggestion to "Name-the-Picture" Contest, The Ogilvie Flour Mills Co., Limited, and mail it to the nearest office as listed.

RESIDENTS OF CANADA, restricted to:
O RESIDENTS OF CANADA ONLY, qualified to enter are Ogilvie Flour Mills Co., Limited and their families are not eligible to compete.

7 In case of a tie the prizes will be divided equally between the two judges is composed of 3 distinguished judges—J. H. McLean, J. H. McLean, Jr. and J. H. McLean, Jr. The correspondence should be sent to Ogilvie Flour Mills Co., Limited and their names will appear in the correspondence.

Reduction In World Stocks Of Grain Is Striking Feature Of World's Wheat Situation

The reduction in world stocks of wheat from the high levels prevailing from 1929 until 1935 is probably the most striking feature of the present wheat situation. The Agricultural Situation and Outlook for 1937, which has just been issued, states: "For the 1936-37 season, it is evident that there will not be the wide margins between world exportable supplies and probable import requirements which existed in increasing degree between 1929 and 1934." This change in world stocks was brought about by a succession of comparatively short crops, particularly in North America.

The total wheat harvest in 1936, exclusive of Russia and China, is estimated at 85 million bushels below the 1935 total. The fact that part of this reduction occurred in the importing countries of Western Europe has brought about a distribution of supplies which is tending to increase world shipments of wheat during 1936-37. World wheat shipments during the crop year 1935-36 reached a total of only 520 million bushels. Estimates of world wheat requirements for the present crop year now range from 580 to 680 million bushels. The Canadian wheat picture has also changed materially. On August 1, 1935, stocks of wheat in Canada stood at 203.3 million bushels. By the same date in 1936 the total had been reduced to 108.4 million bushels. This substantial reduction, coupled with the small crop harvested in 1936, reduced the exportable supplies to such an extent that it is unlikely that exports from Canada will be as high a percentage of total world shipments as they were in 1935-36. During that crop year Canada supplied almost fifty per cent. of the total world import requirements.

The acreage seeded to winter wheat in the United States is estimated to approximate 37.2 million acres. This is the largest acreage in history. Wheat acreages in other countries also remain at high levels and should yields in 1937 approach the normal figure of previous years, production would again be in excess of import requirements and stocks would again increase.

Potato production in Canada in 1936 now estimated at 39,063,000 cwt., is only fractionally higher than in 1935 when the crop amounted to 38,000,000 cwt. Excellent yields in the Maritime Provinces, Quebec, northern districts of the Prairie Provinces, and in British Columbia more than offset the low yields in Ontario and the southern districts of the Prairie Provinces occasioned by severe summer drought.

Alfalfa seed production in Canada in 1936 is preliminarily estimated at approximately 2,100,000 pounds as compared with 1,900,000 pounds in 1935, and 1,650,000 pounds in 1934. Most of the seed was grown in Ontario, but substantial amounts were raised in Manitoba, Saskatchewan, Alberta, and British Columbia.

Farmers in Central China use oxen, water buffaloes, and donkeys for farm work while the farmers in North China employ camels, mules, and horses for transportation, and donkeys and oxen for the more intimate work on the farm. Some Mongol farmers breed camels exclusively for their wool, much in the same way as sheep in Canada.

Pedigree certificates of pure-bred animals registered by the Canadian National Live Stock Records, approved by the Dominion Minister of Agriculture, during 1936 numbered 82,372. Of these, 3,989 were horses; 38,112 cattle; 13,164 sheep; 9,200 swine; 6,929 foxes; 8,044 dogs; 2,826 poultry, and 108 goats.

Replicas Of Crown Jewels

Making Of Them For Display Will Stimulate Trade

One of the variety of ways in which the coronation next May is going to stimulate trade is in the making of replicas of the crown jewels for distribution throughout England and the empire and the United States. Coronation regalia being reproduced for display includes the crown of England, known as Saint Edward's crown. Of massive gold and gem-studded, it is so heavy that almost as soon as it is placed on the King's head it is removed and replaced by the much lighter iron steeple crown, one of the most valuable crowns in existence, encrusted with thousands of precious stones, more than 2,780 of which are diamonds. In the front glows a ruby from Burma, large as a hen's egg. Below the ruby flames the second largest of the "Stars of Africa," a diamond weighing almost 310 carats.

No Expensive Dinners
The Chinese Government has decided that no patriotic citizen should spend more than \$15 for a dinner party. This is part of the new life movement, striking at the favorite form of extravagance in present day China. Not infrequently dinners costing as much as \$100,000 are reported in the newspapers.

Demand for New Zealand rabbit skins is greater than the supply.

The peanut is a member of the same family as the pea.

Likes His New Home

Man From Canada Enjoys Life In Carolina Swampland

Marooned in the jungle swamps of the Carolinas is a man from New Toronto. Since 1913 he has been living on the banks of the Santee river, where his only neighbors are "poor whites" and Negroes. There, 1,000 miles from home, he has his plot of corn and beans and wife and children. Gradually he is losing any desire to return to his native Canada.

He was discovered by Dr. R. M. Saunders of the University of Toronto who tells of meeting him on an expedition into the Carolina swamps. "I forget his name, but amongst the 'crackers' he is known as 'the man from Canada,'" the doctor says.

He was once a brakeman on the Grand Trunk Railway on the western Ontario run. He left Canada to take a position with an American firm on the Atlantic seaboard. Then he lost his job and was stranded near Charleston. That is all Dr. Saunders knows of this ex-Canadian who makes his home in the swampland.

How the man came to marry and settle down among the "crackers" and the Negroes he cannot tell. The standard of living is not very high; they live on corn pone and once in a while they catch a wild pig. Something keeps him there, perhaps it is the influence of the climate or perhaps his wife and children. Dr. Saunders doesn't know.

Queen Of The Netherlands

Governs Royal Household But Other Powers Are Limited

Although Queen Wilhelmina does not rule Holland with a free hand, it is no secret that she does govern the royal household without hindrance. Apart from the home lessons in statecraft, Juliana attended the University of Leyden where she went into broader matters, especially law and economics.

But her mother's training is said to have stuck. About the country people say that the queen and her daughter hate dictators. They are known to be opposed to the Dutch Nazi movement which counts some 50,000 members.

Dutch sovereigns are limited in their powers, and it wasn't so long ago that there was a definite anti-monarchist movement in the Netherlands. The queen's simplicity, her middle-class manners and scrupulous observance of the constitution are credited with having run this movement aground. Not much has been heard of it since 1923.

During the war years, Queen Wilhelmina voluntarily reduced her appointments as well as those of her daughter and of her mother who died in 1934. This saved the Dutch taxpayers several hundred thousand florins and was an act much commented upon by the people.

Where Coal Is Coal

Ton In Baffin Land Costs Purchaser Over \$100

Reginians who fret over winter coal bills would be content with their lot if they talked with Dr. A. G. MacKinnon, who has just returned to civilization after a two-year stay in Pangnirtung, Baffin Land.

One ton of coal up there costs over \$100 and most Reginians could keep their homes cozy and warm all winter for that much money. Very little coal, of course, is used in the far north. Eskimos never use it and their fuel consists of seal oil which they burn in lamps for cooking and for heat in their igloos. A little coal is used by the white men who live in the territory.

Dr. MacKinnon, with his wife, has returned from Pangnirtung, which is just on the rim of the Arctic, after spending two years there in the Anglican church hospital. He was sent north by the lands branch of the federal department of the interior. For some years, he practiced his profession in Saskatchewan at Lajord and at Big River. For nine years prior to going north, he practiced in Manitoba—Regina Leader-Post.

Within Her Rights

The Brantford Expositor says if Queen Mary attends the coronation of her son it will be generally agreed that her proposed presence is a precedent is fully warranted. She has a mother's right to participate in the memorable occasion and to publicly join in the reverential acclaim which will be accorded the new monarch and his queen.

Business Was Good

Police of Istanbul, Turkey, paid the office of the Beggars Co. Ltd., which was conducted by 17 professional beggars. The officers of the law say they obtained evidence showing that the profits of the company in 1935, after salaries had been paid, totalled \$15,000.

A fast talker often will speak as many as 150 words a minute, according to estimates.

The treasure of the former emperor of China is valued at more than \$20,000,000.

Ships Will Be Different

Many Modern Features In Great Britain's New Battle Cruisers
Great Britain's two new battle-ships, laid down early in January on Tyne and Mersey, will be unlike any warships ever known before in the British navy.

They will be five knots faster than any dreadnought British ever has had, and probably faster than the famous battle cruiser Hood. They will mount a new type of gun of a calibre the British navy has not used previously. The ships will have five inches of armor plate on the decks as protection against the largest known aerial bombs. They will carry far more aircraft for launching from catapults than any existing ship.

In the long interval since the last British battleships were laid down, arms makers have been experimenting with new type weapons. Now it is revealed that they have developed a weapon of smaller size than 14 inches, but it is said to be more efficient than the standard 14-inch gun.

Details of this new weapon are secret, but it is known that the new gun weighs 25 tons less than the old one, so that a battleship mounting eight would save 200 tons in weight. This weight could be converted to making the craft less vulnerable by increasing the armor plate.

It is believed that the new British gun fires a shell weighing 1,500 hundredweight and the rate of fire is said to be three rounds in two minutes.

Trying Out New Idea

Electrocution Of Poultry Said To Make Plucking Easier

Electrocution of poultry instead of the usual killing by the neck is being tried by farmers in Canada may result from experiments being conducted by the National Research Council, Ottawa. Methods of electrical stunning of chickens have been tried out in the Council's laboratories with a view to improving the feather release in order to make plucking easier, and also to improve bleeding, if possible.

The Council's nineteenth annual report disclosed a large number of experiments with electrical stunning of poultry. It was found that, if the electric current could be directed to the part of the brain which controls the feather muscles, good feather plucking could be achieved. Further experiments will be carried out to obtain a good comparison with this and other methods of killing, such as the usual brain stick. After electrical stunning, the bird is bled in the usual way, and while the bleeding always appears to be satisfactory, some physiological measure of perfection in the operation is necessary before electrical killing can be compared with other methods, the Council said. Practicability of the method for use on farms is also being considered.

Live Fowl Kept In Hotel

Supplied Dinner For Mohammedan Ruler While In London

When the Sultan of Selangor started back to his kingdom in Malaya after a visit in London a procession of servants carrying 15 pots of steaming chicken preceded him. When the Sultan arrived in London and his beautiful young wife took a fancy to his kingdom in Malaya, he was conformed to the requirements of the Mohammedan faith it was necessary to keep live fowls at the fashionable and exclusive hotel where the court stayed. The birds were killed and prepared for the table by the Sultan's chef.

When he announced the date of his departure it was decided to make a curry of all birds that remained, and eat it while warm during the early stages of the journey. The Sultan of Selangor received \$1,000 a year and rules over 500,000 people.

Had To Hurry

Pat and Mike stood at a busy intersection in New York, watching the seemingly endless streams of motor traffic. A big policeman approached the pair.

"Officer," said Pat, "me friend, Mike, and I are strangers in this town—could ye be after tellin' us how to get across this street without bein' killed?"

"Just watch those traffic lights over there and cross on your color," the cop instructed.

Pat and Mike riveted their eyes on the traffic signal. They watched it flash yellow, then green, and they scurried across on the green.

Arriving at the other side, Mike stopped to gaze again at the traffic signal. For several minutes he watched the lights flash from red to yellow to green.

"Bejehers," Pat, he exclaimed, "they don't give them Orangemen much toime to git across."

Believe Bones Very Old

Two boxes of an early Englishman who lived about 100,000 years ago, were displayed on a table at a meeting of the Royal Anthropological Institute, London. They were found in a gravel pit at Swancombe, in Kent, by Alvan Marston, a Clapham dentist. With them was found a stone axe-head.

By telephone, the human voice can go around the world in one-fourth of a second.

"Oh, this is easy! It's Mr. Smith!"—Der Lustige Sachse, Leipzig.

This Inventive Age

Master Minds Still Working To Make Life Easier

The one hundredth anniversary of the federal patent law now being celebrated discloses the comforting fact that America's master minds are still working to make life easier. Among the clever devices for which patents have been granted are:

A mechanism baited with cheese that automatically ties a bell to a rat's neck and turns him loose to frighten away his fellows.

A "pedal calorificator," by which tubes fastened to your mouth blow hot air into your shoes to warm your feet.

A coffin bell to be rung by an unhappy mortal who wakes up to find himself "dead" and buried.

A travelling washing machine, filled with suds and dirty clothes and attached to the auto's running board. All the laundrymen need to do is to drive his car over rough roads.

Life-saving suspenders, made of fireproof thread that can be unravelled to permit a man entrapped in a burning building to swing to safety.

A cylinder razor covered with sandpaper for wearing down the whiskers (ouch!).

A hair-raising mechanism for boring holes in bald scalps, into which hairs are planted.

Well, we think the patent law is a great thing. They laughed when Ben Franklin helped himself to a spot of lightning with a door key.—New York World-Telegram.

New Safety Pocket

Invention That Will Safeguard Money Has Been Patented

Every man has his own method of safeguarding money—and women, too, whether it be the chorus girl thrusting notes down her stocking or Mrs. Robinson hiding a dollar underneath the potatoes.

Now all of this mystery and ingenuity is to go. A pocket has been patented that will defy anything from prying fingers to razors and acid.

Invented by Mr. A. Hillier of Preston, England, the new pocket is woven in a fine wire mesh of special alloy.

The mouth of the pocket is closed by an improved form of flat zip fastener, which is operated from a different pocket by means of an ingenious arrangement of strings and pulleys.

Not Definite Enough

Sambo turned up at the police station.

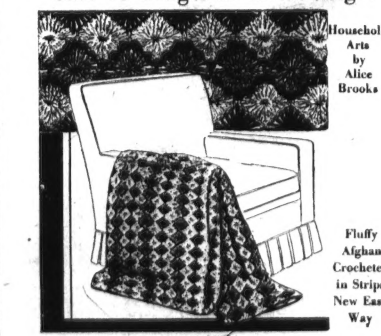

"Chief, sah, Ah needs protection," he said. "Ah done got a unapnious letter this mornin' which says, 'Nigger, let mah chickens alone.'"

"Why do you want protection?" asked the chief of police. "You'll leave the chickens alone, and you'll be all right."

"Dat's all right, boss, but how does Ah know whose chickens I've to leave alone?"

London with its fogs continues to have the lowest mortality record per thousand of inhabitants to any city in the world.

Sure To Delight In Colors Bright

PATTERN 5753

Imagine yourself enveloped in this soft cloud of warmth. A luxurious afghan indeed, it's sure to delight in three colors, especially since the flowers which form the design, row on row, need contrast to "bring them out." The actual crochet is done in simple stripe—three full rows and two half rows of flowers at a time. It makes grand carry-with-you work and would be feather-light in Germantown yarn! In pattern 5753 you will find directions for making the afghan; an illustration of it and of the stitches used; material requirements, and color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Many Indications Point To A Definite Increase In World Trade Conditions

Takes Biggest Risk

Front Seat Passenger Gets Most Severe Impact Of Accident

The girl in the front seat runs the big risk in motor accidents, as 70 per cent. of the severe crushing facial injuries suffered occur to the person riding beside the driver, in the experience of Dr. Claire L. Straith, Detroit surgeon. The majority of these victims are young women. Lacking the support of the steering wheel, which often saves the driver, the passenger is thrown forward more violently at the impact.

The passenger's head strikes the instrument board, where projecting handles, knobs and cranks add to the hazard. Elimination of projecting objects from the passenger's side of the instrument panel should be attempted by motor car engineers, Dr. Straith declares in an article on facial injuries caused by motor accidents, according to Science Service. The use of crash padding, he said, "The ranks of the unemployed and unemployable are already large enough without adding to their numbers persons physically and mentally handicapped by preventable or curable facial defects."

The plastic surgeon cannot expect good results in face injuries unless the first-aid treatment has been carefully done, asserts Dr. Straith. Plastic procedures, such as correcting scars, crushed facial bones or lost eyebrows, ears and nose, should not be undertaken until two months after every trace of infection has disappeared. He tells physicians he replaced severed noses, using skin grafts from the forehead of a woman patient and from below the ear of a man patient.

Hirate Statistics

Britain Produces A Heavy Daily Crop Of Whiskers

The average area of face which a man shaves is 48 square inches. The average number of individual whiskers which grow on this area is 25,000. The average growth of each whisker in 24 hours is one-hundredth of an inch. The average face accordingly grows a total of 250 inches of whiskers per day. Multiply this figure by 15,000,000, the number of shavers in the British Isles, and it is found that Britain produces a daily crop of 50,000 miles of whiskers over an area of 125 acres of face.

There are figures which were produced for the Lord Mayor of London at a formal dinner a few days ago following his ceremonial opening of a huge new safety razor factory in the outskirts of London. It was a grand day for safety razors. Still Joseph Penn, once said, "In the days when men were not all clean-shaven they looked different from one another. Now they all look alike."

The grandest beard of which Europe has any record was grown by Hans Steininger, burgomaster of Braunau in Austria, who died in 1567. You can see an effigy of the burgomaster and his beard in the parish church; and the beard itself, two thick ropes of reddish-brown hair well over five feet long, is still preserved in the local museum. Braunau hopes to be the birthplace of Adolf Hitler.—New York Times.

May Need Pasteur Method

Professor Investigating New Scourge For Horses In Scotland

Professor M. Newstead, who discovered the breeding place of the tsetse fly in the African jungle and saved thousands from the dread sleeping sickness, is to attack a new scourge. It is the grass sickness responsible for the deaths of thousands of horses in Scotland, particularly in Aberdeenshire, and may be affecting the health of humans. Now 82, Professor Newstead has consented to make the research, according to reports in Aberdeen, at the request of David Min, head of a large seed firm, who will finance the work. "My belief," said Professor Newstead, "is that the disease is caused by an invisible virus which can only be isolated and overcome by inoculation of healthy animals with serum taken from a diseased animal. In my opinion it is a question of Louis Pasteur and anthrax all over again."

Marlborough House was recently dazzled by flashes as cameramen photographed some of its treasures. Queen Mary gave her permission and the films are to be used in a cinema being made in aid of the King George V. national memorial fund for the provision of playing fields throughout England.

At a year old, the average child is said to have a vocabulary of seven words.

Chickens are eaten by Americans more than any other fowl.

World trade appears to have definitely turned the corner and for the first nine months of 1936 was showing increases over the previous year. Recovery in world trade, however, has not kept pace with recovery in individual countries. This fact indicates that many of the forces which have impeded International Trade in recent years are still far from being removed. It is encouraging to Canadians to notice that the trade of both Great Britain and the United States has been increasing, as these two countries form the principal market for Canadian export sales. The question of International Trade conditions is carefully analyzed in the fourth annual Agricultural Situation and Outlook, which has been published by the Dominion Departments of Agriculture and Trade and Commerce.

Trade in agricultural foodstuffs has not recovered to the same extent as has been shown for some other products. This fact is attributed to the shift in production which has taken place in the countries normally considered as importers of agricultural produce. These countries, chiefly in Western Europe, have for economic, political, military and social reasons, encouraged the production of more home grown foodstuffs. This has been accomplished by the erection of high tariff barriers and the use of many new barriers to trade. In recent months there has been evidence of some relaxation of these trade barriers. This change of attitude gives a somewhat brighter outlook to the world trade picture. Another feature which is tending to relieve the situation is the trade agreement policies being effected, chiefly by the United States and Canada.

The uncertainty of currency exchange has been a factor impeding world trade in recent years and the decision of France to devalue the franc, in co-operation with Great Britain and the United States, has had a settling effect on foreign exchanges. For the fiscal year ended March 31, 1936, Canada exported agricultural produce valued at \$90,488,000. This was an increase of 10.7 per cent. over the previous year. Approximately 64 per cent. of the farm materials exported go to Great Britain and 21 per cent. to the United States.

Came Out Second Best

Eagle Disappointed To Find Chicken Was Just Metal Bird

The belief that eagles are gifted with piercing eyes, and hence with an exceptionally strong eyesight, seems to be a legend. Here's a story from Desio, Italy, which tells why.

A royal eagle frightened by the rifle shots of Alpine game hunters, flew down the valley in search of a more secure refuge. Passing over the village of Pian, the bird sighted what it thought was a chicken flying above the houses. Scouting a good prey, the eagle swooped down, left with full wings and swift spirals, and began to beat furiously at the supposed prey. The one-sided fight lasted several minutes, and ended with the royal bird getting groggy, and with barely enough strength left to seek refuge in a bell-tower situated close to the scene of the fight.

The eagle had mistaken for a live chicken the metal weathercock which for centuries has been revolving on top of the church spire.

The fact that the bird came to still worse grief shortly thereafter when a hunter, who had witnessed the unequal fight from the street, rushed with a shot-gun to a roof across the bell-tower, and from there killed the eagle.

The bird, which had a 78-inch wing span, is an exhibit in the Desio's museum.

Desio is the birthplace of Pope Pius XI.

Proud Of Their Country

People Of Scottish Ancestry Are Always Very Loyal

A rather significant aspect of the accession of King George VI. and the Queen Consort Elizabeth is the sentimental effect that it will have in Scotland. The fact that the Queen is a descendant of an ancient Scottish family should bind the northern part of the United Kingdom to the Monarchy. A good deal of humor has clustered around the remark of an old Scottish woman when she heard that the Princess Louise, daughter of Queen Victoria, had married the Marquis of Lorne, a scion of the illustrious House of Argyll. "The Queen will be a proud woman this day," she said, "with her daughter marrying an Argyll."—Branford Expositor.

New Hat For Men

Worried because only men in every seven in England goes bareheaded, London hatiers are introducing "a really featherweight hat weighing two ounces or less—so light that the 'hatless' wearer will hardly realize they are wearing headcovering at all," according to their announcements.

About the only difference between the old time novel and one of to-day is \$1.50.

Spruceville District Resident Dies

Elsie Hastings, resident of the Spruceville district for four or five years and former student of the Woody Nook School, died in Lacombe Hospital Monday morning. Miss Hastings recently resided with her parents on the Drader farm, north of Spruceville Hall.

Funeral services will be held at Canadian Junior College Church on Saturday and interment will be made at the Lacombe cemetery. Lacombe Funeral Home has charge of arrangements.

Word has been received that Hanson Olsen of Whitecourt, Alta., one of the chief mourners, will be unable to attend the funeral due to illness.

Sidelights on Junior Hockey Game

The Junior hockey game played here last Friday night between the Drumheller Rockets and the Lacombe White Wings started approximately half an hour later than the advertised time, 8:30 p.m. This wait brought forth the time schedule tabled below from one of our readers.

- 8:30—Lacombe Juniors leave ice after 15-minute workout. Game should start at this time.
- 8:31—Glenn White sticks his head out of the door and counts the crowd.
- 8:32—Brooks appears on ice and scores from a difficult angle; nobody in the net.
- 8:33—Cliff joins him and scores a very pretty goal; net still empty.
- 8:34—Costigan, the rink manager, appears with a shovel; puts it away without doing anything.
- 8:35—H. Landon looks critically over ice, joined by three others who also take a look.
- 8:35 1/2—Jimmy Hampson comes out of his warm office to look the crowd over. Shivers. "Not many."
- 8:36—Word comes that Drumheller team is four miles the other side of Stettler.
- 8:37—Chess Irish takes sick; has to be carried out.
- 8:38—White Wings appear on ice again for practice.
- 8:40—Ice deserted again; fans getting tired.
- 8:42—Drumheller team arrives; they saunter casually into visitors' room.
- 8:44—Referee appears.
- 8:45—Referee appears with skates on; returns to warm office.
- 8:46—Glenn White comes from hockey room very excited; guesses that game is going to be late.
- 8:47—Chess Irish comes back, looking a little white.
- 8:48—Drumheller team takes ice; fans stroll to their seats.
- 8:49—Referee visits penalty box.
- 8:50—Referee visits linekeepers.
- 8:52—Referee still visiting.
- 8:53—Teams called to center ice.
- 8:54—Referee drops puck; game is on.

Final Result: 1-0 for Lacombe White Wings.

Spruceville

SPRUCVILLE. — Mr. and Mrs. Irvin Gottschick are receiving congratulations on the birth of a nine-pound baby girl, born Tuesday morning, Feb. 23rd. Mother and daughter are both doing well.

Mrs. Eva Shipley (nee Proudfoot) of East Cochrane has been visiting with her mother, Mrs. Proudfoot. She planned on returning to her family Tuesday but was prevented from doing so by the state of the roads. Mrs. Dale Brown of Montana is still staying with her sister, Mrs. Proudfoot, who we are glad to report is now able to be up for a little while every day.

The Junior debate had to be put off on account of impassable roads. Mrs. George Newton (nee Annie Broadbent) of Edmonton is visiting with her family in Spruceville.

Reports on Convention
Although the roads were very bad, quite a few ladies turned out to the U.F.W.A. meeting last week. Mrs. Boyd Crocker gave a very interesting talk on the U.F.W.A. convention. The ladies decided to make a layette for the maternity fund, and many other activities were discussed. Notably a resolution to the Federal Government with reference to war and its prevention.

Many New Books
There are now 2100 books in the library, of which 375 new ones were purchased last year and 26 were donated. A membership of 269 has borrowed a total of 11,595 books. Each year the chapter offers prizes in Grades 8, 9, 10 and 11 attaining the highest average over 75 per cent. This year prizes were awarded in Grades 8, 9 and 11 only, as no pupil in Grade 10 reached the required standing of 75 per cent.

Influenza in District
Mrs. Abe Brunsma returned from the Lincoln district last Thursday suffering from the flu, and now unfortunately the whole family is down with it. Mr. Milton Morter, who had to go to town on account of his illness and subsequent death of his brother Charles, is confined to bed with flu.

The first in a series of monthly debates to be held in the hall under the auspices of the Junior U.F.A., the Busy Bees, will take place in the Spruceville Hall Friday night, March 5th. Let us all get behind our young folks to help them in their venture.

Stout left the district for Naches, Washington, last Friday, where he has secured a job. We are sure sorry to see our young folk moving out but wish him the best of luck.

Mrs. Rice is looking after Jimmy and Joe Stout until this fresh outbreak of measles in the Spruceville district dies down.

DEBT ADJUSTMENT ACT DECLARED ULTRA VIRES

(Continued From Page One)

meeting at the Parliament buildings and will soon denounce the truth or untruth of the rumors that have persisted regarding serious splits in the party. Thursday the Legislature opens its sessions with Chief Justice Harvey, administrator of the province, acting for the Lieutenant-Governor, who is still far from well.

This session promises to be one of the most interesting ever held in the legislative chamber and its enactments will likely be of the most revolutionary in the realm of economics. It will be to your interest to cut this ad out at once. Refer it to some needy friend. State age when ordering. Not sent C.O.D. Not sold in drug stores. Dr. Fay's booklet on "Family Limitations." 25c the copy. A very remarkable work. Adv.

I. O. D. E. CHAPTER REVIEW ACTIVITIES

Giving a resume of the year's work at the annual banquet and meeting of the Lord Lancelot Chapter of the I.O.D.E. recently, Mrs. P. W. Pratt, Regent, gave an idea of the magnitude of the work accomplished by the members, and said: "It has been a most successful year, the different branches of the work having been carried on in an excellent manner, the educational work, especially the growth of the library, being most important."

Through the fact that the members in turn have acted as librarians, the chapter has been able to keep the library open both Wednesday and Saturday. In addition, members have spent many hours preparing new books for the shelves and repairing and discarding old ones. The discarded books have been sent throughout the district to people having no other reading matter.

Mrs. Pratt also paid tribute to the town officials who have made the library premises possible, and to the town secretary, E. P. Minkler, through whose sympathetic interest the library room is kept comfortable.

Many New Books
There are now 2100 books in the library, of which 375 new ones were purchased last year and 26 were donated. A membership of 269 has borrowed a total of 11,595 books. Each year the chapter offers prizes in Grades 8, 9, 10 and 11 attaining the highest average over 75 per cent. This year prizes were awarded in Grades 8, 9 and 11 only, as no pupil in Grade 10 reached the required standing of 75 per cent.

The Child Welfare Department
sent out nine Christmas hampers, besides responding to many demands during the year. Many social affairs were held during the year, among which were a bridge party and a Christmas party.

FAMILY LIMITATIONS
and the dissemination of sane and information thereupon is gaining great headway in the U.S. In November last, the U.S. publications announced the results of a great straw vote taken on the subject by one of the largest periodicals—and it was found that over 75 per cent were in favor of enlightening the public.

So, in all probability, we shall see within a short period the dream of Margaret Sanger and Dr. Fay fully realized. They have both advocated giving the people full information, claiming that enlightenment of the public would effectively reduce the fatalities attributable to illegal operations. Dr. Fay has always been very glad to lecture on the subject—and many thousands of our people have been long acquainted with Dr. Fay's Compound—in fact it may always be found in the homes where there is concern over retaining the health and beauty of the better half. The worry of the month, which so easily mars a woman's face and makes her prematurely old, is eliminated by keeping Dr. Fay's Compound on hand, because it is absolutely safe to take and most certain in its expected results; and the cost is negligible. If you wish to avoid worrying and be absolutely sure of the five dollars to the Fay Company, 697 Fay Bldg., Vancouver, B.C. You may be in need of Dr. Fay's compound in the future if not now. It will be to your interest to cut this ad out at once. Refer it to some needy friend. State age when ordering. Not sent C.O.D. Not sold in drug stores. Dr. Fay's booklet on "Family Limitations." 25c the copy. A very remarkable work. Adv.

Regent's cottage, Gull Lake, a banquet and afternoon tea at the home of Mrs. R. W. Clarke, and the annual banquet at the Empress Hotel, which was pronounced a most sumptuous one by all.

Arranged for Addresses
The chapter was active in obtaining speakers whose addresses were of an instructive, patriotic and entertaining nature.

In March, Mrs. Colin Campbell, O.B.E. of Winnipeg, addressed the chapter on the subject, "Under Four Sovereigns." In June, Mrs. F. J. Field, of Edmonton, gave a public lecture on the Silver Jubilee of King George 5th, which she personally attended. On this occasion the chapter offered a prize to the school student writing the best essay on her address.

Again in September, Mrs. A. Aldwinckle, who had attended the Vimy

Ridge Memorial Services, gave a most interesting account of her trip.

A Patriotic Organization
In concluding her remarks, Mrs. Pratt said: "May I remind you that we are a patriotic organization. Patriotism in its fullest sense means service—service in King and Country and to our fellow citizens. We should realize that each primary chapter is but a cog in an enormous wheel, and it is meaningless without the wheel. Those magic initials, 'I.O.D.E.', after a chapter's name are a great guarantee to the public of good faith. It is not enough that we work in and for our own chapter—we should as loyal daughters of the Empire try to spread the work throughout the whole Dominion."
